

## **Parameters for 2011 - 2011 LHC beam operation plans (incl. intensity steps)**

*Thursday 9 December 2010 11:30 (35 minutes)*

The assumed LHC beam parameters for 2011 are first summarised. The overview of the 2011 schedule is presented and includes hardware commissioning, beam re-commissioning, re-validation, scrubbing, technical stops, MD, ions and special physics run requests. A proposal is made for the strategy in intensity stepping up and potential issues are described together with possible actions. Finally, the potential peak and integrated luminosity are given

**Presenter:** WENNINGER, J.

**Session Classification:** Session 7: Wrapping up
