Graeme and André

2021-12-15

EP R&D Software Activities

- Today's meeting focuses on Track Reconstruction, talk from Paul
- Next meetings should be on Simulation and Analysis
- This is the last meeting of 2021 - André and I wish you *all the best for the holiday season*, we hope you have an good rest after another challenging year

In 2021 we achieved a lot in the Software R&D Project, where things are now working at full steam - we will have the opportunity to reprise that in the 2021 report that we'll write early next year

Thank you!
