What is SeaTable?

100% online spreadsheet
for private users

100% database
for developers

100% no-code platform
for IT-experts

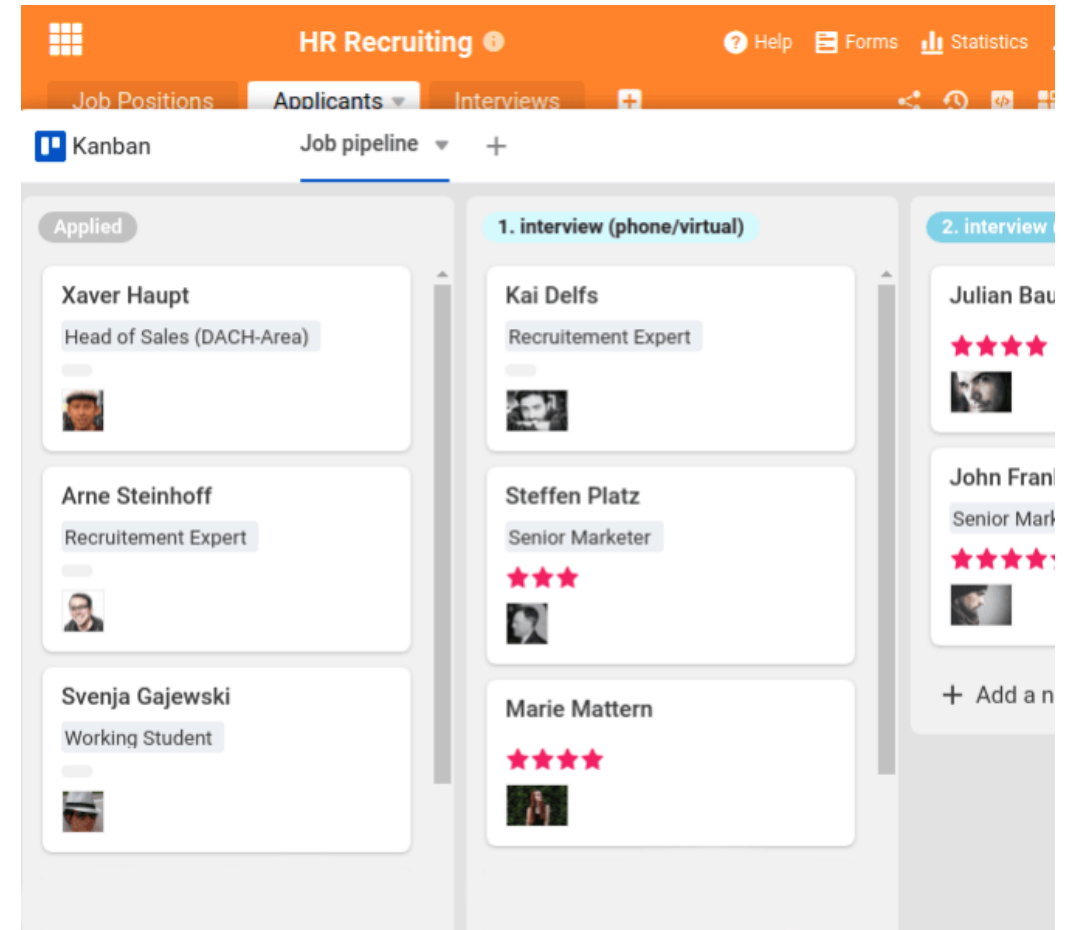

“No-code” was the main focus of Development in 2021

100% online spreadsheet
for private users

100% database
for developers

100% no-code platform
for IT-experts

No-Code?

Short explanation of the advantages of no-code

- fast creation and deployment of applications
- can be implemented by non-experts
- cross-team collaboration
- easy integration with other platforms through apis
- focus on problem solving, less on design and interfaces

SeaTable no-code features: page design

The screenshot displays the SeaTable no-code editor interface. The main workspace shows a page design on a grid background. The design includes a logo, a title "Partner Award", a message "We are very pleased to award a new partner status to:", a table of partner details, and a "Gold" status badge. The right-hand sidebar shows styling options for the selected text element.

Partner name	datamate GmbH & Co. KG
Address	117er Ehrenhof 5
	55118 Mainz
	Germany
Partner number	GER-34877
Partner since	September 2018

The new partner status is:

Gold

The styling sidebar on the right includes the following options:

- Static text
- X: 0, Y: 210
- Width: 794, Height: 63
- Rotation: 0
- Order: [Icons]
- Text: Partner Award
- Font: Arial
- Font size: 24
- Font weight: 600
- Line height: 1,4
- Horizontal align: Left, Center, Right
- Vertical align: Top, Middle, Bottom
- Text color: #000000
- Background: Transparent, Filled
- Padding: 0

There is a huge potential for no-code

the american market leader

1.2 Billion

collected in 12 financing rounds

industry analysis report

87 Billion

estimation size of the total no-code
platform market in 2027

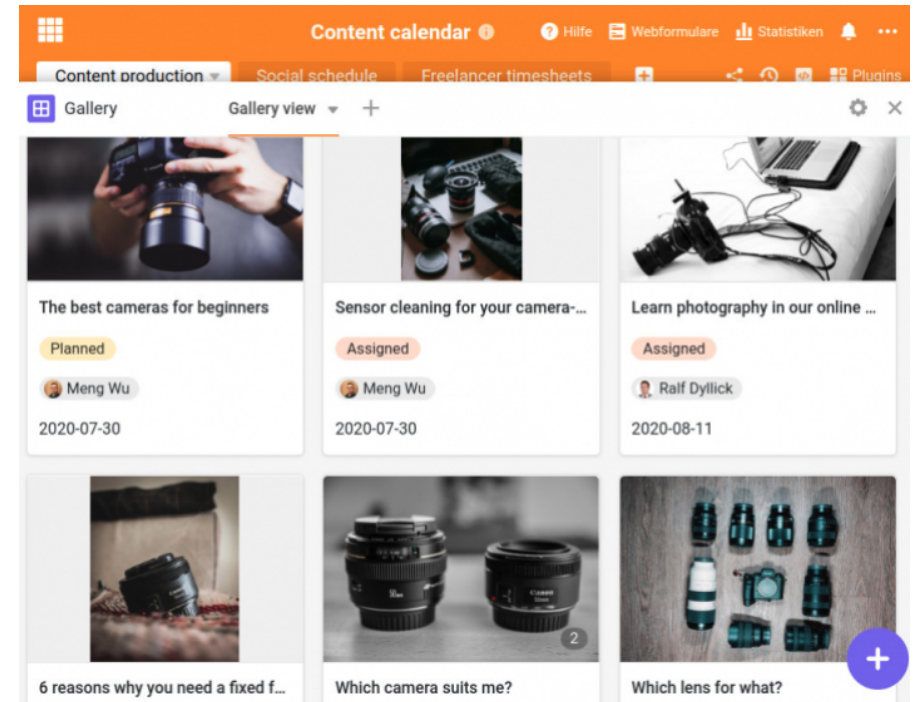

SeaTable is neither the first nor the largest player in the market - but SeaTable has two advantages.

On-Premises Setup

- SeaTable is the only valid solution if somebody wants to keep full control over his/her data.
- SeaTable was developed right from the beginning to provide a self-hosted On-Premises version.

Complete REST-API

- All necessary functions are available for a seamlessly integration any other application.
- There are nearly no limits with the On-Premises version.

Organizations around the world use or evaluate SeaTable

- **German Armed Forces** (Innovation project at the School Information Technology in cooperation with the cyber innovation hub)
- **United Nations** (Office of the United Nations High Commissioner of Human Rights)
- **Wikimedia**
- **Qatar Tourism Council**
- **City administration Kiel and Stuttgart**
- **Möbel Inhofer**
- ...
- **Fun fact: a contractor of the us-department of homeland security**

**Our ambitions:
SeaTable should become the leading
on-premise no-code platform.**
