

CS3 ORG Future Governance

cs3community.org

OPENCLOUDMESH

CS3 ORG

- Grass-roots informal place for actors in CS3 community to collaborate on software (github)
 - Specifications/APIs (CS3APIs) and implementation (REVA)
- Actors
 - **CERN**: many of these components started in context of CERNBox and were donated to the community
 - **CS3MESH4EOSC** : interoperability layer for federated clouds / applications, ScienceMesh
 - **Owncloud**: early adopter and major contributor (OCIS)
 - **Seafile**: planning adoption
 - **HIFIS Federation**: adoption and developing additional grouping functionality
 - **EOSC Association**: interoperability standards under discussion
 - ...

Questions

- What should be the model on further collaboration in CS3 org?
- How do we reconcile priorities of different actors?
- What should be the governance model?
- How do we structure this activity and ensure technical coherence?
- Do we need a legal entity?

Objectives for this workshop

- Initial discussion today
- Agree on the next steps via a follow up meeting

Next steps

- Prepare a summary of this discussion and distribute to CS3 community
- Interim process on governance documents
 - PRs in Github
- Programme the next meeting
