Some thoughts about OCM-over-ScienceMesh

Monday 24 January 2022 16:00 (20 minutes)

Existing implementations of OCM generally implement the public-link workflow and the share-with workflow.

Reva implements the share-with workflow and the invitation workflow.

Should other OCM implementations add this third workflow too?

Should Reva add the public-link workflow?

Can we keep OCM-over-ScienceMesh and generic OCM-over-WWW in lock-step?
