

Update from the HEPiX IPv6 working group

Thursday, October 28, 2021 6:25 PM (25 minutes)

During this year the HEPiX IPv6 working group has continued to encourage the deployment of dual-stack IPv4/IPv6 services. We also recommend dual-stack clients (worker nodes etc). Many data transfers are happening today over IPv6. This talk will present our recent work including the ongoing planning for moving to an IPv6-only core WLCG.
