

Summary of Learning To Discover workshop

Wednesday, 11 May 2022 15:25 (25 minutes)

Learning To Discover event has taken place 19th to 29th April 2022.

Three themes have been selected based on the one hand, their interest for HEP, and the fact there is already a number of HEP teams working on it, on the other hand, their importance in the Machine Learning field : Representation Learning over Heterogeneous/Graph Data, Dealing with Uncertainties and Generative Models. A final HEP and AI 3 days conference concluded the event.

This talk is a summary of Learning To Discover event, specially tailored to IML workshop in order to avoid overlaps.
