

EPPOG Database Copyright Issues

Dave Barney

Need for Copyright?

- Aim of the EPPOG database is to distribute photos, animations, documents, event displays etc. to as wide a public as possible
 - So why is there a need for a “Copyright”?
 - And who should the Copyright belong to?

Terms of use: example from CERN

Terms of use for CERN audiovisual media

Use of CERN audiovisual media denotes agreement with the following terms:

1. CERN provides the image free of charge for educational and informational use.
2. The image is provided "as-is" and the user shall hold CERN free and harmless in connection with its use.
3. The image may not be used in a misleading, inappropriate or offensive manner, in a military context, in advertising or promotion, or in a manner that suggests any kind of endorsement by CERN or its personnel.
4. CERN is to be credited as the source of the image.
5. CERN retains copyright in the image. Download and use of the image does not amount to a transfer of intellectual property.
6. The image may not be sold, distributed or otherwise made available for use by third parties.
7. CERN reserves the right to alter or delete images without notice.

Please contact us by using the [contact form](#) if you have any questions or comments with respect to CERN content; if you are unsure whether your intended use meets these terms; or, if you seek permission for use that does not fall within these terms.

CERN appreciates your interest in its work. More information about CERN is available at www.cern.ch.

Copyright abuse on any CERN website should be reported using the [contact form](#).

Creative Commons Copyright

- Most CERN experiments use:
 - “Copyright CERN, for the benefit of the XXX collaboration under Creative Common License 3.0”
 - CERN acts as the legal entity in the (unlikely) event that problems occur – i.e. violation of the terms of use
 - From <http://creativecommons.org/>
 - **Share, Remix, Reuse — Legally**
Creative Commons is a nonprofit organization that increases sharing and improves collaboration

Creative Commons

Step 1: Review Conditions

Creators choose a set of conditions they wish to apply to their work...

Attribution. You let others copy, distribute, display, and perform your copyrighted work – and derivative works based upon it – but only if they give credit the way you request.

Non-Commercial. You let others copy, distribute, display, and perform your work – and derivative works based upon it – but for noncommercial purposes only

No Derivative Works. You let others copy, distribute, display, and perform only verbatim copies of your work, not derivative works based upon it.

Share Alike. You allow others to distribute derivative works only under a license identical to the license that governs your work.

Creative Commons (cont.)

Step 2: Select License

...resulting in a license that indicates how others may use it.

Overall EPPOG Suggestion

- By default state that all materials in our database are “subject to Creative Commons License 5 unless otherwise specified”
- Any files in the database can also embed their own Copyright messages if necessary
 - E.g. “Copyright INFN” message on a brochure or at the beginning of a video
- Any document within DocDB can also contain a “Copyright.txt” file to explain any particular Copyright and/or Terms Of Use
