Properties of Heavy Nuclei in South Atlantic Anomaly region

Wednesday 10 August 2022 15:50 (20 minutes)

The Alpha Magnetic Spectrometer collected over 150 billion cosmic rays events during the first 8.5 years of operation aboard the International Space Station. A component of $Z>2$ ions with rigidities below the rigidity cutoff and located in the South Atlantic Anomaly have been measured both in the down-going and up-going direction.

Collaboration name

AMS

Primary authors: OLIVA, Alberto (Universita e INFN, Bologna (IT)); GIOVACCHINI, Francesca (Centro de Investigaciones Energéticas Medioambientales y Tec. (ES)); VALENCIA OTERO, Martha Liliana (National Central University (TW))

Presenter: GIOVACCHINI, Francesca (Centro de Investigaciones Energéticas Medioambientales y Tec. (ES))

Session Classification: Cosmic Rays

Track Classification: Cosmic Rays
