

# Upgrade to Drupal 9

Web Team

08/10/2021

# D9 Ready

- ✓ ***CERN Theme*** is D9 Ready
- ✓ ***CERN Override Theme*** is D9 Ready
- ✓ ***CERN Modules*** are D9 Ready

# Exceptions for overrides

- **Local Themes** and **Modules** are user's responsibility to make them D9 Ready.
- **Check this guide** we have created on how to make a module D9 Ready.
- If there are **PHP functions**, you need to check if they contain **deprecated code**.

# The role of our team

- **IR Web Team** is responsible for CERN Theme and CERN Modules.
- **IT Drupal Infra Team** is responsible for Drupal Core and Contrib modules provided by the Infra.
- **Users** are responsible for local themes, Contrib modules not provided by the infra and custom modules.

# The role of our team

- **IR Web Team** *will not* support websites that have local copies of the CERN Theme or CERN Modules.
- **If the website owners don't know** how to upgrade them themselves, then the solution is to remove the local copies and use these that are provided by our team.

# Questions

- For any other question feel free to use the **Drupal community forum**.
