

JRA1: Cross-area session summary

- 12 cross area objectives
- Only three of them was on the agenda
 - Remaining were covered in Messaging workshop or in parallel sessions
- Monday delays allowed to touch only two of them (no real discussion):
 - Delegation
 - Argus as the EMI authorization service

“EMI-blessed delegation ...”

- Delegation in use: Gridsite, “gsi”, ARC delegation, Unicore delegation
- Initial focus on “proxy delegation”, “SAML-delegation” may come later
- Compute (EMI-ES task force):
 - Delegation part of the EMI ES interface
- Data (SRMSec group):
 - delegation method replacing “gsi” capability
- **Conclusion:** there is an excellent opportunity to agree on the common “EMI delegation” suitable for both compute & data

Argus integration (compute, data)

- Clear integration plan & deployment scenarios were presented
 - Two integration methods
