

Compute Area Client Harmonization

**Björn Hagemeyer
(Research Centre Jülich)**

Outline

- Members
- Objectives
- Work plan
- Current status

Group members

- Martin Skou Andersen
- Alvise Dorigo
- Björn Hagemeyer

Objectives

- usability
- maintainability
- portability to different architectures and operating systems

Work Plan

- Current state of the clients (PM7)
- Harmonization opportunities (PM10)
- Implementation Work plan (PM12)
- Implementation (PM12-PM24)

Current state of the clients

- Information about clients collected in a single document
 - ARC
 - Classes, libarcclient, WS ARC Client, Classic ARC Client
 - gLite
 - CREAM C++ APIs and CLI
 - UNICORE
 - Internal client classes, UCC, HiLA
