Measurements of the mass, width and coupling CP structure of the Higgs-boson with the ATLAS detector

Friday, 1 July 2022 16:20 (20 minutes)

Measurements of the fundamental properties of the Higgs boson are presented, including its mass, width, and the CP properties of its coupling in various production modes and decay channels.

Presenter: HIROSE, Shigeki (University of Tsukuba (JP))

Session Classification: Higgs theory and experiment
