

**29th International Conference on Supersymmetry and Unification of
Fundamental Interactions (SUSY-2022)
Ioannina, 27 June 2022**

Ladies and Gentlemen,

It is with great pleasure and honor to welcome you in the opening ceremony of the 29th International Conference on Supersymmetry and Unification of Fundamental Interactions (SUSY-2022) that is being organized by the Department of Physics of the University of Ioannina.

Without a doubt, this conference is being of great scientific importance inspiring further outstanding developments in the fields of fundamental interactions of elementary particles. It also provides a forum for scientists in order to foster and exchange views and ideas on theoretical, phenomenological, astrophysical and experimental aspects of supersymmetric theories and all other approaches to physics beyond the Standard Model.

The University of Ioannina by its scientific and research community has always been a strong supporter of frontier science and within its limited means has always tried to foster the research efforts of the Greek scientific community.

With these few words, may I congratulate all those who contributed, the local Organizing Committee for the excellent organization as well as of the International Advisory Committee for this remarkable scientific and research initiative that is being organized for many years now.

Closing, I wish every success to the Conference, which I am sure that is going to bring about remarkable results and substantial progress in the scientific knowledge.

Thank you.

Prof. Triantafyllos Almpanis
Rector of the University of Ioannina
