

# ALICE, ATLAS, CMS & LHCb Career networking event

Meet former ALICE, ATLAS, CMS & LHCb members who have gone on to work in a wide range of fields and hear about the CERN Alumni programme, during an evening of presentations and discussion.

??

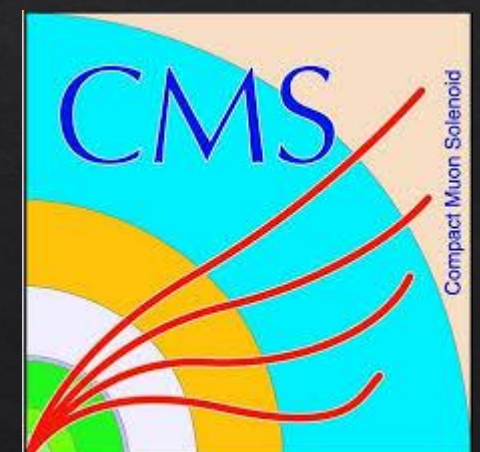

15 November 2021  
16h00

# background

- NTUA  
MSc, theoretical HEP
- NTUA – NCSR Demokritos – CERN  
PhD at the CMS experiment
  - Higgs analyses
  - Supersymmetry searches
  - Tracker upgrade
- Mostly C++/Bash oriented, started Python after PhD
- Very little exposure on ML
- NATO project

# current role

- Had relatively long period of job search
- 2018 – : EY Brussels Incubator team
  - Various data cleaning, processing, visualizations
  - Attrition prediction on employee data
  - Sensor data to validate employee mobility
  - Organizational Network Analysis
  - Shiftwork optimization
- Big Project: Assistant on MS Teams
- Data Scientist / python developer role

# cultural differentiators

- Business technical orientation / strategy
- Result / time oriented culture
- Communicating technical results to management / client
- Effort needed does not always meet time given
- Chargeability goals VS big internal projects

# what the CERN experience can offer

- CERN network
- Scientific approach
- Diverse and demanding environment
