

8th International Symposium on Symmetries in Subatomic Physics (SSP2022)

SSP2022

Monday, 29 August 2022 - Friday, 2 September 2022

Scientific Programme

The scientific programme comprises the following topics

Symmetries (C, P, T, CP, CPT, Lepton flavour violation)

Symmetries and Interactions (QED, QCD, Electroweak interactions, Lorentz invariance)

Fundamental interactions

CKM (Light and heavy flavours)

Future Facilities

Application of new technologies
