

Session Program

14 October 2010

IWLC2010 talks

Tracking and Vertexing

CERN

Thursday 14 October

09:20

Tracking and Vertexing

Session | Location: CERN

09:20–09:40

Layout optimisation for the vertex and forward-tracking region in the CLIC-ILD and CLIC-SiD detector concept

Speaker

Mr Dominik Dannheim

09:40–10:00

Performance of a Full Silicon Tracker at CLIC

Speaker

Blai Pie Valls

10:00–10:20

Studies for a TPC in a CLIC Detector

Speaker

Martin Killenberg

10:20–10:40

Design status of the Timepix2 pixel detector chip

Speaker

Xavier Llopart Cudie

10:40–11:00

The Saltro chip design for TPC pad readout

Speaker

Paul Aspell

11:00
