

Tenth International Fermi Symposium

Tuesday 11 October 2022

Plenary 4: AGN (11:00 - 13:00)

-Conveners: benoit Lott

time	[id] title	presenter
11:00	[18] Multi-wavelength emission of blazars: connecting theories with observations	Dr ZHANG, Haocheng
11:30	[78] High-energy neutrino sources and their electromagnetic counterparts in the Fermi-LAT era	GARRAPPA, Simone
12:00	[41] Physics of neutrino emission from blazars	BOETTCHER, Markus
12:15	[53] Bridging the Gap - The first sensitive 20-200 MeV catalog	MARCOTULLI, Lea
12:30	[30] A multi-wavelength spectral characterization of extreme BL Lacertae blazar candidates hidden in the 4FGL catalog.	NIEVAS, Mireia
12:45	[65] Multi-wavelength Study of Radio Galaxies in MeerKAT fields	PHURAVHATHU, Dakalo
