

Tenth International Fermi Symposium

Wednesday, 12 October 2022

Parallel 10: GRBs and Fast Transients- I (16:00 - 17:45)

-Conveners: **Andreas von Kienlin**

time	[id] title	presenter
16:00	[72] GeV emission from a compact binary merger	MEI, Alessio
16:15	[134] The Gravitational Wave-Gamma Ray Burst Working Group and InterPlanetary Network in O4	BURNS, Eric
16:30	[129] Discovery of high-energy gamma-ray emission from a reverse shock of GRB 180720B	ARIMOTO, Makoto
16:45	[75] Intergalactic magnetic field studies by means of the gamma-ray emission from GRB 190114C	LONGO, Francesco
17:00	[52] A wind environment and Lorentz factors of tens explain gamma-ray bursts X-ray plateau	Dr DERELI BÉGUÉ, Hüsne
17:15	[77] The Search for Extra-Galactic Magnetar Giant Flares in Fermi GBM Data	TRIGG, Aaron
17:30	[120] Hunting the gamma-ray emission from Fast Radio Bursts with Fermi-LAT	LONGO, Francesco
