**ESO's Extremely Large Telescope (E-ELT)  
Instruments Day  
Geneva – 16<sup>th</sup> February 2022**

Michel Hübner  
Swiss ILO Office

02.12.2021

# Connecting scientific instruments to the largest optical telescope

- 4 + 2 E-ELT Instruments
- Run by independent consortia with different jurisdictions
- Procurement range est. 100 MEUR
- Supply needs in Mechanisms, Optics, Cryogenics, Vacuum, Detectors, Control
- First light 2027

# Event description

- Connect E-ELT Instruments procurement officers with the European supplier industry (fifteen ESO Member States)
- Information exchange between ESO , E-ELT instrument engineers from the institutes, and industrial companies.
- Presentations of procurements and schedules from all six E-ELT Instrument consortia with a specific focus on procurements:
  - with a high tech content,
  - where competition is seen as fair among Member States (more than one supplier),
  - with a substantial allocated budget.
- Poster session offered to companies to promote their technology and facilitate B2B discussions during the event.
- Evening dinner program
- Event main objectives are to improve the networking and cooperation between industry and institutes in the field of large scientific space observation instruments
- Sponsors: University of Geneva / Federal State Secretariat for Research and Innovation SERI / EU ENRIITC

# Venue

- Wednesday 16th February 2022 (11:00 – 18:00)
- Geneva - International Congress Center - 400 seats
- Invitation through the country ESO ILOs
