Other HSF Activity, Meetings and Involvements

- ## HSF Coordination Meetings
  - Every 2 weeks, open to all, I think the frequency here is the right one
- ## Compute Accelerator Forum (organised with SIDIS and openlab)
  - Every month, very wide range of topics related to *accelerators*, so a lot of cross-over
  - We should consider coupling CAF meetings to HSF WGs - reduce meeting load and boost attendance
    - CAF Organisers **Graeme Stewart**, **Stefan Roiser**, Michael Bussman, Maria Girone, **Ben Morgan** - plenty of HSF hats/input
- ## Software and Computing Roundtable (organised with JLab and BNL)
  - Wide range of topics of interest, many interesting presentations, often from HSF involved people - turnout very strong from nuclear physics colleagues
  - Would be very suitable to discuss issues directly with NP
    - HSF contributor is Graeme Stewart, could well rotate
- ## WLCG Software Liaisons
  - Represent software interests at WLCG Management Board and in meetings with the LHCC Referees
    - Graeme Stewart and Liz Sexton-Kennedy (appointed by WLCG)
- ## Grid Deployment Board
  - Monthly meetings, facility and infrastructure focused
  - There is a *GDB steering meeting*, which helps with GDB planning, where HSF sits, reps. being Michel Jouvin and ~~Graeme Stewart~~ (too busy, so should rotate)
