## The BO2022 project. For a history of students and graduates of the University of Padua (1222- 20th century)

*Monday, 3 October 2022 09:20 (30 minutes)*

The tutorial presents the Bo2022 database, a tool that collects - and will continue to collect in the future - Padua's academic population over the eight centuries of its history. The research project BO2022, from which this database was born, began in 2019 and ended in February 2021, and one of its aims was to map the academic population from the foundation of the University of Padua, in 1222, to the second half of the twentieth century. And this is to give us new quantitative data, with which to read the history of our university, casting a glance at complex phenomena - mobility, freedom of study and research, religious pluralism, gender - outside the celebratory cameos of "illustrious students".

**Primary authors:** LA ROCCA, Cristina (Università di Padova); Dr ZORNETTA, Giulia (Università di Padova)

**Presenter:** LA ROCCA, Cristina (Università di Padova)
