

The global topic of this Technology Forum is « Robotics and operation at large-scale instruments in harsh environments », organized in 7 thematic areas :

1. Robotics in Space
2. Robotics underwater
3. Robotics at ground-based telescopes
4. Robotics for research at other harsh natural environments
5. Robotics and detectors at CERN
6. Nuclear field applications: electronics and detection techniques
7. Best practice example: DaVinci and future prospects of Robotics medicine
