Contribution ID: 50

Type: 15 Minutes

# CERNBox: today and tomorrow

*Tuesday 8 March 2022 15:30 (20 minutes)*

CERNBox is key enabler service built on top of EOS for users at CERN and beyond. The service is used by more than 37K users and stores over 15PB of data, representing all the user communities at the laboratory.

In this talk we will explain the current status of the service, the challenges we faced in 2021 and our vision for the future: CERNBox as the gateway for a federation of heterogeneous storage spaces.
