RT2022 – Aug 1st, 2022, - Monday – Poster A

10	Matei Vasile	Performance evaluation of modern time-series database technologies for the ATLAS operational monitoring data archiving service #10
33	Yuting Wang	A 4-phase PLL Frequency Multiplier for Wilkinson ADC in SCA ASIC #33
34	Nan Li	Triggerless Electronics based on HTM Method for Cosmic Ray Muon Imaging #34
36	Yutaro Sato	A strip-sensor readout chip for the J-PARC muon g−2/EDM experiment #36
37	Chunxiao Song	Prototype of a Read-out control ASIC for data collection and commands distribution #37
52	Jörg Schacht	Enhancements of the Fast Interlock System for Wendelstein 7-X operational phase OP2.1 #52
54	Zibing Wu	A Real-Time multi-channel ADC based Digitizer for radiation detector applications #54
66	Shiqiang Zhou 世强 周	An eFPGA core embedded in a pixel chip and SEU reinforcement design #66
68	Ran Zheng	NTIMP1—a Fast Pulse Readout Chip with 1.2V Power Supply for Time-of-Flight Measurement #68
71	Yuezhao Zhang	HiBeam-T: A TPC with pixel readout for heavy-ion beam monitoring #71
76	Ke Zhong	Developments of counting rates correction method and its use in the 4πβ − γ coincidence counting #76
93	xiaochuan xie	Realization of Detector Control System of Physics Experiment #93
95	SHIVAKANT JHA	Challenges of the Design of Plant I&C System for ITER XRCS-Survey Diagnostic #95

40	Zhe Ning	The development of a real time data acquisition system based on FPGA for CAEN digitizer DT5751 #40
92	Honghui Zhang	The Fast Readout Unit for general control and data acquisition in heavy-ion experiments #92
96	Shi Li	Application of compression algorithm in data acquisition and Storage system for EAST #96
98	himanshu tyagi	Event driven High Speed Data Acquisition with IEEE 1588 synchronization for long pulse operations of Indian Test Facility for ITER DNB #98
