

Nederlandse Astronomenconferentie 2022

Tuesday, 31 May 2022

Parallel Session: Compact objects, Stars, & Planets (16:30 - 19:00)

-Conveners: Ignas Snellen

| time | [id] title | presenter |
|-------|---|-----------------------------|
| 16:30 | [57] The impact of time-dependent stellar activity on exoplanet atmospheres | LOUCA, Amy |
| 16:45 | [58] Chemistry around AGB stars: a theoretical sensitivity study | MAES, Silke |
| 17:00 | [59] The Mass and Composition of the LkCa 15 disk | STURM, Ardjan |
| 17:15 | [60] Irradiated but not eclipsed, the case of PSR J0610-2100 | VAN DER WATEREN, Emma |
| 17:30 | [77] The MICADO Atmospheric Dispersion Corrector | VAN DEN BORN, Joost |
| 17:45 | [62] Indication of a Pulsar Wind Nebula in SN 1987A | GRECO, Emanuele |
| 18:00 | [63] Dust properties in the Crab nebula: constraints from infrared emission polarisation | CHASTENET, Jeremy |
| 18:15 | [64] Water ice in the era of JWST - bridging laboratory work and astronomical observation | MONTEIRO ROCHA, Will Robson |
| 18:30 | [65] The (absence of) UV afterglows in Supernovae | INKENHAAG, Anne |
