

# Finding the Z - boson

Filip Pantic  
Vladimir Ignjatijevic  
Supervisor:  
Nikolina Ilić

# Standard Model of Elementary Particles

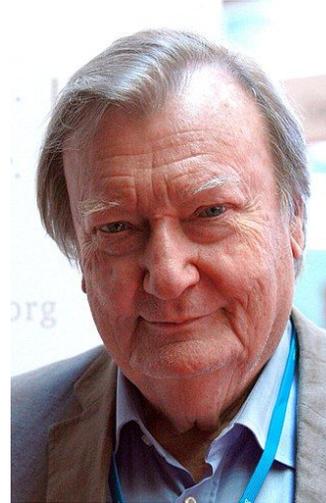

# History

1933. - Enrico Fermi, theory of the weak force.

SPS → proton-antiproton collider.

1983. - W,Z boson observed for the first time.

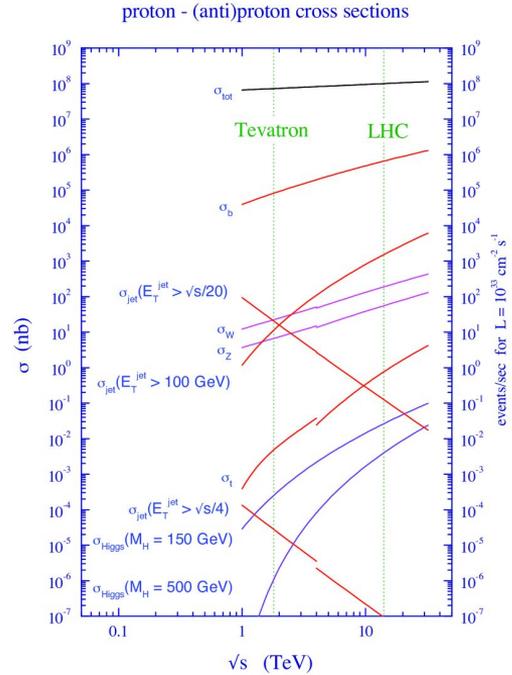

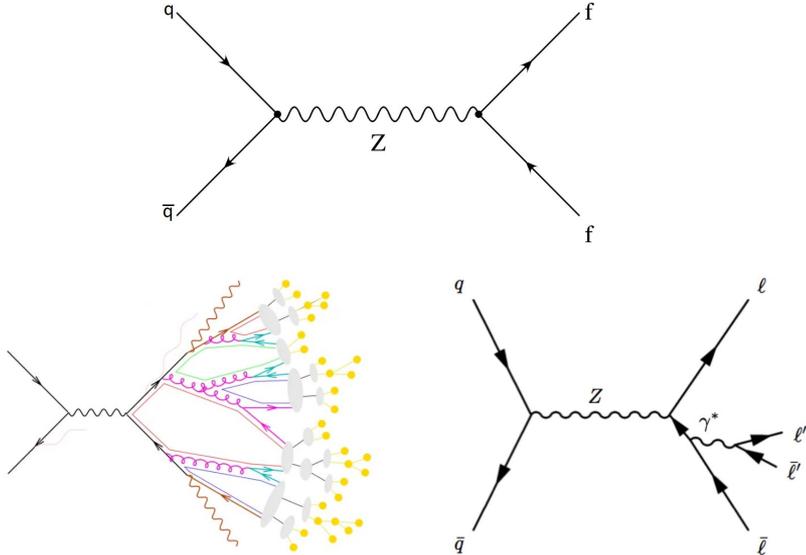

Carlo Rubbia

Simon van der Meer

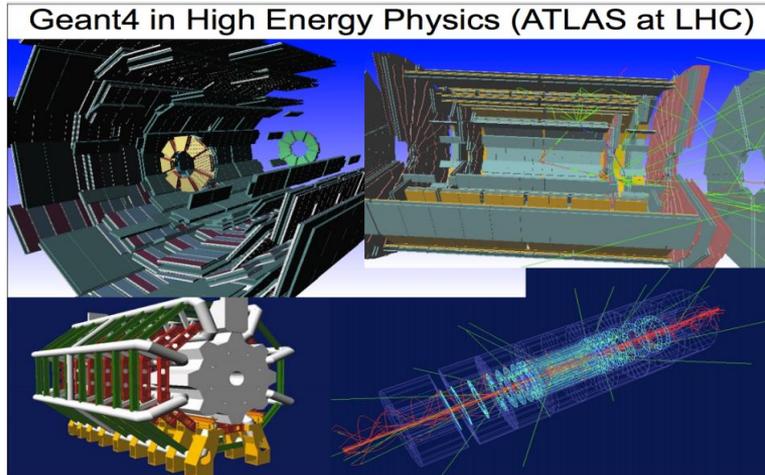

# Prechecking a theory - simulation

## Generating events

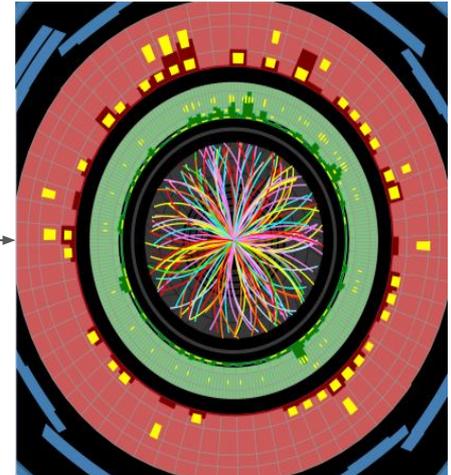

# Prechecking a theory - simulation

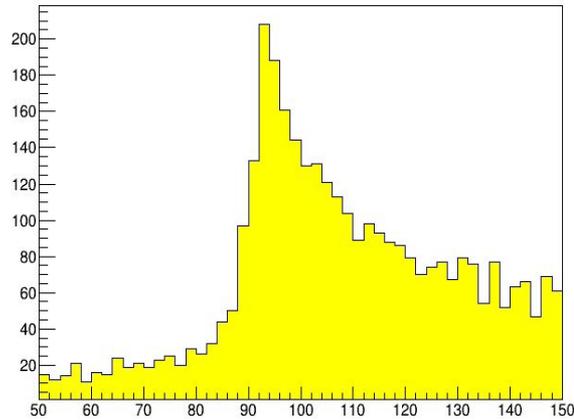

## Detector simulation

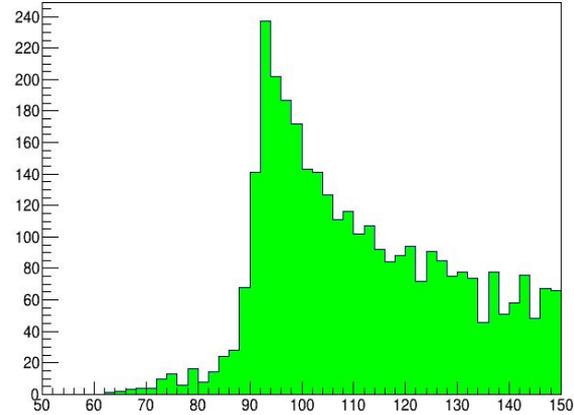

Compare

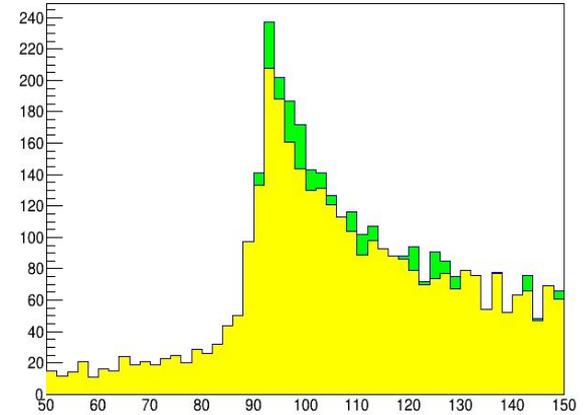

# Simulated and reconstructed Z decay

Z boson decay reconstructed

Z boson decay simulation

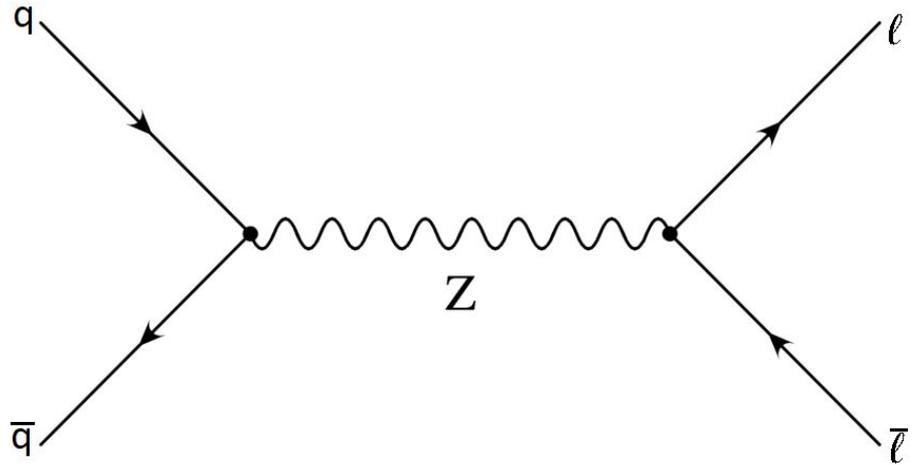

Comparison

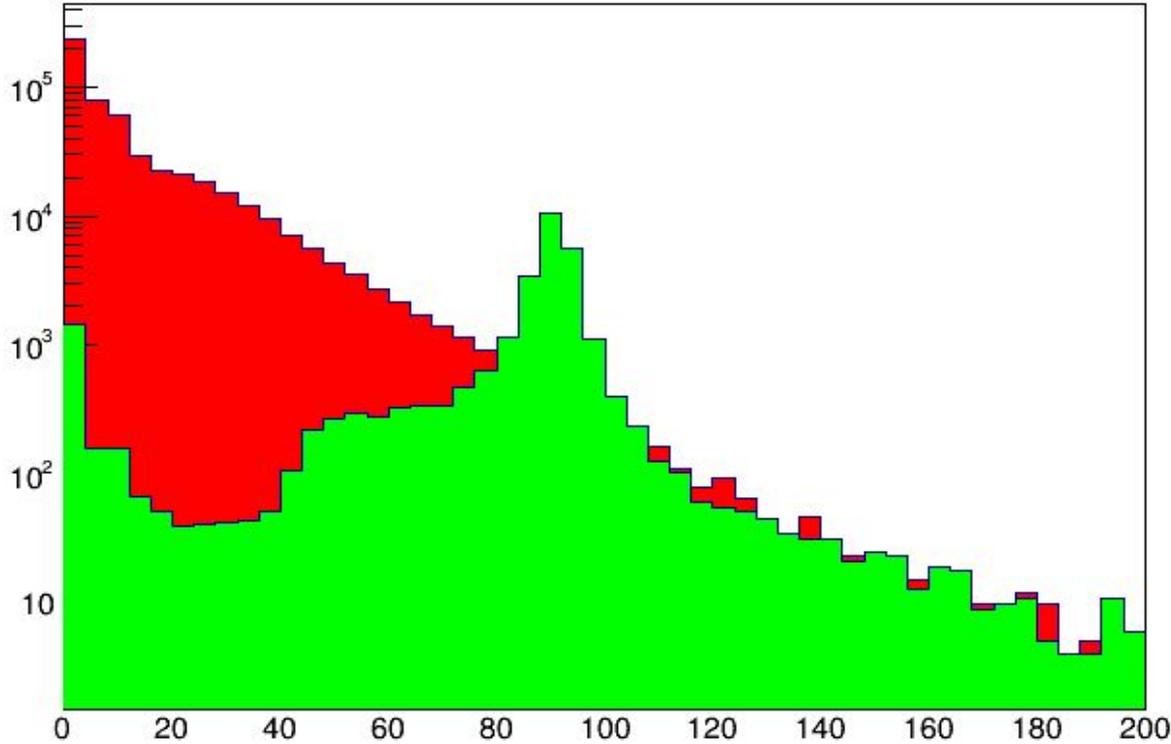

# Z boson decay to muons

Conditions:

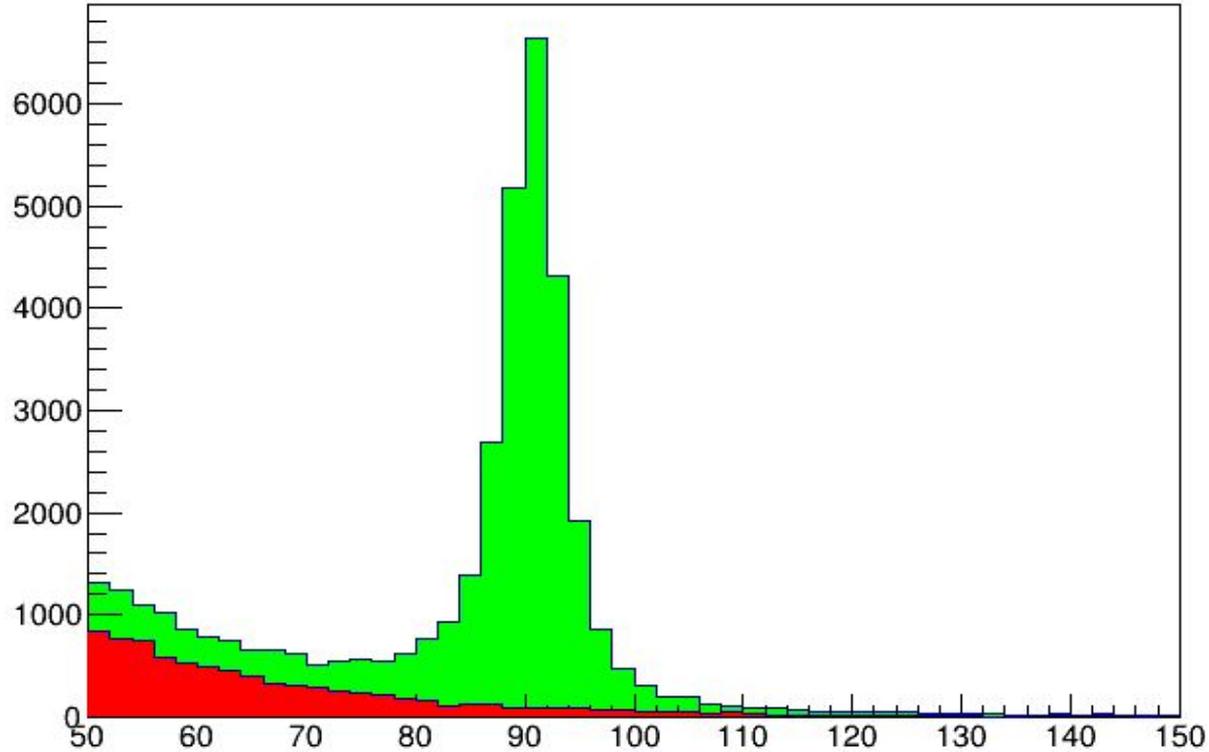

1. number of muons
2. muons charge
3. muons energy  $> 20\text{GeV}$

# Z peak in real data - *Unfiltered*

# Z peak in real data

Thank you for your attention!
