## Mixing and CPV in charm decays at LHCb

*Tuesday 18 July 2023 14:15 (15 minutes)*

LHCb has collected the world's largest sample of charmed hadrons. This sample is used to measure  $D^0 - \bar{D}^0$  mixing and to search for  $CP$  violation. New measurements from several decay modes are presented, as well as prospects for future sensitivities.
