Measurements of the CKM angle γ at LHCb

Tuesday, 18 July 2023 16:00 (15 minutes)

The tree-level determination of the CKM angle γ is a standard candle measurement of CP violation in the Standard Model. The latest LHCb results from time-integrated measurements of CP violation using beauty to open charm decays are presented. These include updates to previous Run 1 measurements using the full LHCb Run 1+2 data sample, measurements using new decay channels, and the latest LHCb γ & charm mixing combination.
