

RADSAGA: outcomes and benefits

Wednesday 2 March 2022 16:30 (15 minutes)

RADSAGA is a research and training EU funded project, which involved 30 partners, trained 15 Early-Stage Researchers, and made advancements on the design and qualification of radiation tolerant components and systems. Interdisciplinary training aiming at forming highly qualified professionals, network engagement, communication, and data sharing are key values for the project. The presentation will address those key-elements emphasising on the project's outcomes and benefits.

Presenters: ALLEGRETTI, Sonia (TERA Foundation (IT)); AGUIAR, Ygor (CERN)

Session Classification: Research and Development
