The PDG Empire

**Particle Data Group collaboration
of 176 authors
from 21 countries and 108 institutions
+ 700 consultants in the HEP community**

M. Barnett – November 2010

551 new papers with **2158** measurements

108 Reviews written or edited by PDG

RPP: **1422** pages

Booklet: **306** pages

The Web allows us to see what most interest our readers.

The hits (page views) on

Data Listings = Reviews

almost exactly equal.

Clearly people care about both.

12 years ago: Very little

Now:

Astrophysical Constants
Big Bang Cosmology
Cosmological Parameters:
 H_0 , Λ , Ω , etc.
Experimental Tests of
Gravitational Theory
Dark Matter
Cosmic Background Radiation
Cosmic Rays

Figure 21.1: Confidence level contours of 68.3%, 95.4% and 99.7% in the Ω_Λ - Ω_m plane from the Cosmic Microwave Background, Baryonic Acoustic Oscillations and the Union SNe Ia set, as well as their combination (assuming $w = -1$). [Courtesy

BOTTOM, CHARMED MESONS ($B = C = \pm 1$)

$$B_c^+ = c\bar{b}, B_c^- = \bar{c}b, \text{ similarly for } B_c^{*+}\text{'s}$$

B_c^\pm

$$I(J^P) = 0(0^-)$$

I, J, P need confirmation.

Quantum numbers shown are quark-model predictions.

B_c^\pm MASS

| VALUE (GeV) | DOCUMENT ID | TECN | COMMENT |
|---|-------------------------------------|----------|------------------------|
| 6.277 ± 0.006 OUR AVERAGE | Error includes scale factor of 1.6. | | |
| 6.2756 ± 0.0029 ± 0.0025 | ¹ AALTONEN | 08M CDF | $p\bar{p}$ at 1.96 TeV |
| 6.300 ± 0.014 ± 0.005 | ¹ ABAZOV | 08T D0 | $p\bar{p}$ at 1.96 TeV |
| 6.4 ± 0.39 ± 0.13 | ² ABE | 98M CDF | $p\bar{p}$ at 1.8 TeV |
| • • • We do not use the following data for averages, fits, limits, etc. • • • | | | |
| 6.2857 ± 0.0053 ± 0.0012 | ¹ ABULENCIA | 06C CDF | Repl. by AALTONEN 08M |
| 6.32 ± 0.06 | ³ ACKERSTAFF | 98O OPAL | $e^+e^- \rightarrow Z$ |

- ¹ Measured using a fully reconstructed decay mode of $B_c \rightarrow J/\psi\pi$.
- ² ABE 98M observed $20.4^{+6.2}_{-5.5}$ events in the $B_c^+ \rightarrow J/\psi(1S)\ell\nu_\ell$ with a significance of > 4.8 standard deviations. The mass value is estimated from $m(J/\psi(1S)\ell)$.
- ³ ACKERSTAFF 98O observed 2 candidate events in the $B_c \rightarrow J/\psi(1S)\pi^+$ channel with an estimated background of 0.63 ± 0.20 events.

B_c^\pm MEAN LIFE

"OUR EVALUATION" is an average using rescaled values of the data listed below. The average and rescaling were performed by the Heavy Flavor Averaging Group (HFAG) and are described at

- ⁶ ABE 98M result is derived from the measurement $[\sigma(B^+) \times B(B^+ \rightarrow J/\psi(1S)K^+)] = 0.132^{+0.0}_{-0.0}$ by using PDG 98 values of $B(b \rightarrow B^+)$ and $B(\dots)$.
- ⁷ ACKERSTAFF 98O reports $B(Z \rightarrow B_c X)/B(Z \rightarrow \dots) = 6.95 \times 10^{-5}$ at 90%CL. We rescale to our PDG
- ⁸ ABREU 97E value listed is for an assumed $\tau_{B_c} = \tau_{B_c} = 1.4$ ps.
- ⁹ BARATE 97H reports $B(Z \rightarrow B_c X)/B(Z \rightarrow qq) = 6.95 \times 10^{-5}$ at 90%CL. We rescale to our PDG 96 values of B candidate event is found, compared to all the B which gives $m_{B_c} = 5.96^{+0.25}_{-0.19}$ GeV and $\tau_{B_c} =$

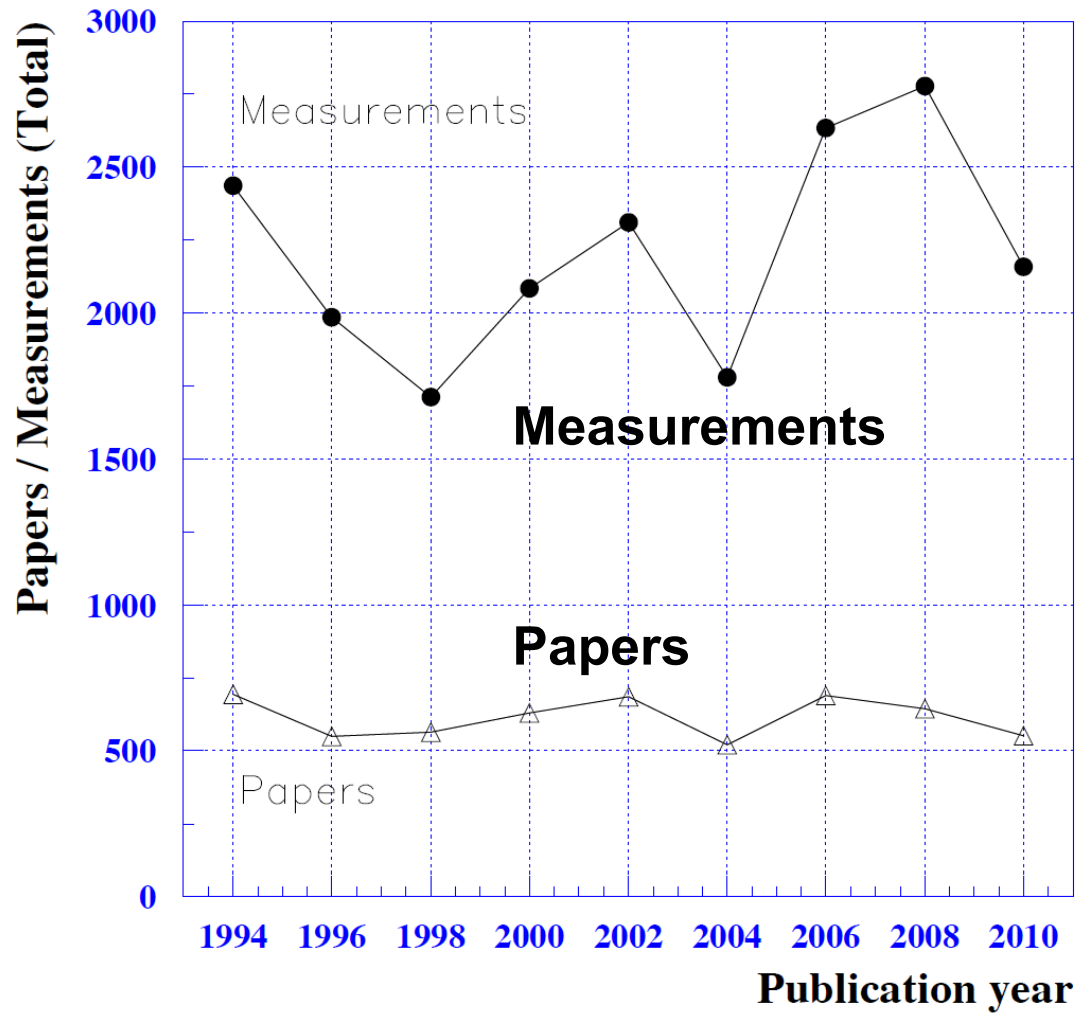

$\Gamma(J/\psi(1S)\pi^+)/\Gamma_{\text{total}} \times B(\bar{b} \rightarrow B_c)$

| VALUE | CL% | DOCUMENT ID |

- 31,000 Booklets requested**
- 15,000 RPP books requested**
- 11 million hits/year on website (>180 countries)**
- 38,000 citations of RPP**
- Most cited publication in HEP**

The Review is the all-time top cited article in High Energy Physics with 38,000 citations (SLAC-SPIRES)

Excluding
Mirror sites
and
Education
webpages

Each point is one average.

Peak at left due to conflicting measurements.

Broad peak at right due to conservative error bars.

Four publishers bid on RPP and Booklet:

Physics Letters B (Elsevier)

Physical Review D (AIP)

Journal of Physics G (IoP)

European Physical Journal C (Springer)

Confidential

Confidential

Vital roles of CERN, Japan, SLAC

50-year collaboration

Administration for CERN funding (Michael Doser).

Pays publisher directly for their copies (except this year 😊).

Oversees support for the Meson Team (space, travel), which is mostly non-CERN people who meet at CERN.

Mirror website maintained.

Nine CERN members (as individuals):

Doser, Basaglia, Ceccucci, Giudice, Gurtu, Hoecker, Roesler, Sauli, and Silari.

24-year collaboration

Administration for Japanese funding (Ken-ichi Hikasa)

Oversees support for Japanese members (travel).

Mirror website maintained.

In charge of major sections.

Reviews and Data Sections

- **Neutrinos**
- **CKM Quark Mixing**
- **Top quark**
- **Higgs bosons**
- **Supersymmetry**
- **Compositeness of quarks and leptons**
- **Axions**
- **Heavy bosons (W' , Z' , etc.)**
- **Even more exotic particles.**

Leadership (past and present)

- Dr. Kasuke Takahashi
- Prof. Yoshio Oyanagi
- Prof. Ken-ichi Hikasa (current leader)

Seven Japanese physicists

- Dr. Kaoru Hagiwara (KEK)
- Prof. Ken-ichi Hikasa (Tohoku University)
- Dr. Kenzo Nakamura (KEK)
- Dr. Yoshihide Sakai (KEK)
- Prof. Takayuki Sumiyoshi (Tokyo Metropolitan U.)
- Prof. Masaharu Tanabashi (Nagoya University)
- Prof. Taizan Watari (Tokyo)
- Dr. Akira Yamamoto (KEK)
- Prof. Hitoshi Murayama (various)

Many years collaboration (> 20)

Coordination with SLAC SPIRES database via the SLAC Library group.

Yields our ability to link to the papers from which the measurements come.

Many discussions of improved coverage for the HEP community.

The End

Procedures

The process of producing the *Review of Particle Physics*

See also organization charts in Summary talk

Literature Search

**Complete Literature Search by two people of 20 journals
(600 papers per edition predominantly from
PL, PRL, PR and EPJ)**

Enter Literature search results in database

**Distribute assignments of papers to
Encoders and Overseers**

Encoding

**Each Paper Read Carefully by Two People:
by encoder and by overseer**

Encoder and Overseer initiate data entry

**Encoding data entered into database:
Sections have very different formats**

**Create new sections, delete sections,
reorganize/combine sections**

Reviews

Write/edit Reviews describing content of and/or problems in a given section

Referee each review and note (3-5 referees)

Place reviews into system so can produce book and web versions

Final processing

Edit all sections for consistency, errata, quality, etc.

**Request Verification of every entry
from each experiment**

Enter corrections/changes from Verifications

**Calculate Averages, Fits and Best Limits.
Many of these are unique by section**

Prepare Summary Table

**Prepare Conservation Laws table
(with impact on Listings and Summary Table)**

Production

Post Listings and Reviews on web

Produce 1400-page book of Summary Tables, Listings, Reviews

Produce web versions of everything in book

Produce 308-page Booklet with Summary Tables and abridged version of reviews

Quality Assurance

**The HEP Community and many others
depend on us for accuracy and integrity**

- **All reviews have 3-5 referees.**
- **Every item of data that is entered is checked by the experiments (700 people help).**
- **PDG Advisory Committee reviews all PDG operations**

We strive to only report what is a fair consensus of the community.
E.g.- For the growing B sections, the three encoders are from Belle, BaBar, and Tevatron.

We invite comments from the collaborations on many sections.

We organize mini-workshops when we need to consider expanded and improved coverage of a section (such as D mesons, B mesons, neutrinos, tau leptons, CKM, extra dimensions,)

Workshops lead to improved coverage

- Neutrino
- CKM
- D Meson
- τ lepton
- Extra-dimensions \longrightarrow
- Statistics

Constraints on deviations from Newton's gravitational force law

Coordination with working groups at

LEP, Tevatron and B-factory on:

- Electroweak fits,
- B lifetimes, B mixing,
- V_{cb} and V_{ub}
- top quark mass, etc.

PDG role in:

- CKM workshops (CERN 2002, Durham 2003, San Diego 2005)
- Statistics workshops, etc.

**Looking forward to the new Higgs Working Group
(LHC and Tevatron)**
