The International Workshops on Radiation Imaging Detectors are held yearly and provide an international forum for discussing current research and developments in the area of position sensitive detectors for radiation imaging, including semiconductor detectors, gas and scintillator-based detectors. Topics include processing and characterization of detector materials, hybridization and interconnect technologies, design of counting or integrating electronics, readout and data acquisition systems, and applications in various scientific and industrial fields.

Scientific Committee
Matthieu Boone, University of Ghent, Belgium
Cinzia Da Via, University of Manchester, United Kingdom
Roelof de Vries, PANalytical B.V., The Netherlands
Joaquim Dos Santos, Universidade de Coimbra, Portugal
Wasi Faruqi, MRC LMB, United Kingdom
Christer Fröjdh, Mid Sweden University, Sweden
Heinz Graafsma, DESY, Germany
Renata Longo, University of Trieste, Italy; INFN, Italy
Ralf Hendrik Menk, Elettra Sincrotrone, Italy
Thilo Michel, Friedrich-Alexander-Universität, Germany
Seppo Nenonen, Oxford Instruments Technologies Oy, Finland
Valeria Rosso, University of Pisa, Italy; INFN Pisa, Italy
Bernd Schmitt, PSI, Switzerland
Val O’Shea, University of Glasgow, United Kingdom

Local Organizing Committee
Gian-Franco Dalla Betta, University of Trento (Chair)
Lucio Pancheri, University of Trento
Alberto Quaranta, University of Trento
Coralie Neubüser, TIFPA-INFN
Nicola Massari, Fondazione Bruno Kessler
Giovanni Paternoster, Fondazione Bruno Kessler
Roberto Iuppa, University of Trento
