23rd International Workshop on Radiation Imaging Detectors

Contribution ID: 71

Type: Poster

Particle beam imaging by measuring secondary electron bremsstrahlung using a CdTe imager

Monday 27 June 2022 16:36 (1 minute)

Particle beam therapy is recognized as an excellent method for cancer treatment. On the other hand, due to their high dose localization, deviation of the irradiated area from the planned has a significant adverse effect on surrounding normal tissues. Non-invasive visualization of the therapeutic beam is required to optimize the treatment effect. The objective of this study is to establish a real-time beam imaging technique for measuring secondary electron bremsstrahlung by use of a CdTe imager. In the presentation, we will report on the analysis of beam image and on the accuracy of the estimated range variation derived from the analysis.

Primary authors: TSUDA, Michiko (Faculty of Science and Technology, Gunma University / Takasaki Advanced Radiation Research Institute, National Institutes for Quantum Science and Technology); Dr YAMAGUCHI, Mitsutaka (Takasaki Advanced Radiation Research Institute, National Institutes for Quantum Science and Technology)

Co-authors: TOYOKAWA, Hidenori (Japan Synchrotron Radiation Research Institute); Mr SATORI, Ryota (Faculty of Science and Technology, Gunma University); Dr KADA, Wataru (Faculty of Science and Technology, Gunma University); Dr KAMIYA, Tomihiro (Faculty of Science and Technology, Gunma University); Dr SAKAI, Makoto (Gunma University Heavy Ion Medical Center (GHMC)); Dr NAGAO, Yuto (Takasaki Advanced Radiation Research Institute, National Institutes for Quantum Science and Technology, 'YABE, Takuya (Takasaki Advanced Radiation Research Institute, National Institutes for Quantum Science and Technology / Postdoctoral Research Fellow of the Japan Society for the Promotion of Science); Dr KAWACHI, Naoki (Takasaki Advanced Radiation Research Institute, National Institutes for Quantum Science and Technology)

Presenter: TSUDA, Michiko (Faculty of Science and Technology, Gunma University / Takasaki Advanced Radiation Research Institute, National Institutes for Quantum Science and Technology)

Session Classification: Poster
