23rd International Workshop on Radiation Imaging Detectors

Contribution ID: 22

Type: Poster

## Spacepix-2: Sol MAPS Detector for Space Radiation Monitoring

Monday, 27 June 2022 17:06 (1 minute)

Radiation in space is a potential risk to human health and electronic systems. Spacepix-2, the successor of Spacepix-1 [1], is a high voltage monolithic active pixel sensor (HV-MAPS) ASIC capable of measuring flux and distinguishing between types of radiation, protons, electrons, and ions. Spacepix-2 features 64 × 64 pixels matrix with a pixel pitch of 60 µm and a total sensitive area of 3.84 × 3.84 mm2. Analog signals from pixels are digitized by 32 10-bit column ADCs with successive approximation register (SAR). The total power consumption is 43 mA from a 1.8 V power supply. Sensor diodes are biased at -150 V. Special Spacepix-2 functions are backside channel signal processing, SPI/LVDS readout modes, hit trigger output, debugging features, thermometer, radiation-hardened, multichip operation, and analog pixel output. Chip is implemented in 180 nm SoI technology.

**Primary authors:** VANCURA, Pavel; Mr GECNUK, Josef (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Dr JANOSKA, Zdenko (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Mr JIRSA, Jakub (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Mr KORCHAK, Oleksander (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Mr KORCHAK, Oleksander (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Mr KORCHAK, Oleksander (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Mr LEDNICKY, Denis (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Dr MARCISOVSKY, Michal (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Dr MARCISOVSKA, Maria (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Dr MARCISOVSKA, Maria (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Dr SVIHRA, Peter (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Dr SVIHRA, Peter (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Dr SVIHRA, Peter (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Dr SVIHRA, Peter (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Dr SVIHRA, Peter (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering); Dr SVIHRA, Peter (Czech Technical University in Prague, Faculty of Nuclear Sciences and Physical Engineering)

Presenter: VANCURA, Pavel

Session Classification: Poster
