

# AE2 - Wednesday Workshop Update

- We know that we are still having very useful discussions at the workshop
  - Therefore we wanted to use the first session this morning to carry on that process
  - This should focus on outcomes, conclusions and follow-ups
- Room assignments are:

<b>Topic</b>	<b>Room</b>
Analysis Facilities	Auditorium Joliot Curie
ML tools and differentiable computing workflows	100-0-A018
Analysis User Experience and Declarative Languages	100-0-A015

- N.B. We shall also remerge the live notes from the discussions

# Report Writing Plan

- For those of us who can stay this afternoon, the idea is to start to write the outcomes
  - This would be a discussion of main topics and conclusions sketched out, rather than collaborative fine prose writing
    - Alternatively, try Novel Writing as a spectator sport:  
<https://www.youtube.com/watch?v=ogPZ5CY9KoM>
- We have a [master document](#), which sub-links for each of the topics
  - To be recombined after first drafts
- We aim in the document to
  - Document discussions and conclusions reached during the workshop
  - R&D that would be needed in the next 5 years to improve the ecosystem for user analysis
    - Investigations / metrics that would need to be defined where consensus or conclusions cannot yet be reached

# Report Writing Rooms

<b>Topic</b>	<b>Room</b>
Analysis Facilities	Auditorium Joliot Curie
ML tools and differentiable computing workflows	100-0-A018
“Real-time” online/trigger-level analysis	100-0-A015
Analysis User Experience and Declarative Languages	100-0-Salle des conseils
Analysis on reduced formats or specialist inputs	100-9-913
Bookkeeping and systematics handling	100-0-A030
