Software Security L3: Web application security, exercise debriefing

Wednesday, 14 September 2022 11:45 (1 hour)

This third hour consists of a debriefing of the exercises, and in particular those web-related. Various vulnerabilities typical to web applications (such as Cross-site scripting, SQL injection, cross-site request forgery etc.) are introduced and discussed.

Summary

Presenter: LOPIENSKI, Sebastian (CERN)

Track Classification: Software Engineering
