Data Analysis L4: Hypothesis testing and p-value

Friday, 9 September 2022 14:00 (1 hour)

We will learn about the hypothesis testing procedure and all of its key concepts. We will discuss how to choose a critical region and learn about errors of first and second kind. We will learn the importance of a blinded analysis and understand all the needed steps before looking at the data. Finally, we will discuss when can we announce a discovery in science and the concept of a p-value.

Summary

Presenter: SCULAC, Toni (University of Split)
