

Dark Sector Insights with Upcoming CMB Observations

Thursday, May 26, 2022 2:39 PM (23 minutes)

Observations of the cosmic microwave background (CMB) have played an essential role in shaping our understanding of the history, evolution, and contents of the universe. CMB surveys planned over the next decade will map the microwave sky with unprecedented precision. I will discuss how these forthcoming observations will provide characteristically new insights into particle physics and cosmology, focusing especially on probes of dark sector physics enabled by CMB observations.
