NEG Pump Installed

NEG Pump Installed

Interaction chamber pressure NEG VS TMP

0.7 x 9mm 3rd skimmer

Jet	Egun	NEG (N2)	TMP (N2)	NEG (Ne)	TMP (Ne)
Off	Off	1.15E-09	3.2E-08	8.68E-10	3.20E-08
Off	On	5.64E-09	--	5.33E-09	--
On	Off	1.06E-08	--	3.25E-08	--
On	On	1.55E-08	4.58E-08	3.71E-08	3.87E-08

0.3 x 9mm 3rd skimmer

Jet	Egun	NEG (N2)	TMP (N2)	NEG (Ne)	TMP (Ne)
Off	Off	8.16E-10	1.66E-09	8.16E-10	1.66E-09
Off	On	8.40E-09	--	8.40E-09	--
On	Off	4.32E-09	1.14E-08	1.41E-08	--
On	On	9.53E-09	3.66E-08	2.16E-08	3.75E-08

Conclusion: NEG behave similar if not better as the TMP in the interaction chamber

NEG VS TMP installed in interaction chamber (Nitrogen)

Condition	CH1	CH2	CH3	CH4	CH5

3rd skimmer
0.3 x 9mm

TMP 1

- Additional fan installed for potential heat problem for long time run.
- No issues seen with TMP in nozzle chamber, including full day of operation with gas. TMP feel warm.

Conclusion

- NEG behave similar if not better as the TMP in the interaction chamber for both 3rd skimmers.
- The NEG does not seem to be saturated (More than 17 hour jet of Nitrogen)
- Neon can be used, the pressure is higher than Nitrogen but still in 10-8 range.
- Future plan:
 - NEG in the dump chamber.
