Portugalijos dalelių fizikos bendruomenės modelis - LIP

Monday, 11 April 2022 15:45 (15 minutes)

LIP is the Portuguese Laboratory for experimental Particle and Astroparticle Physics and develops its R&D activities mainly in the framework of experiments at CERN, ESA and in other international scientific facilities such as GSI, SNOLAB, SURF(LUX) and the Pierre Auger Observatory. LIP activities include the development of new Instruments and Methods, advanced Computing, advanced education and outreach. LIP has premises in Lisbon, Coimbra and Braga and its members are presently the Portuguese science founding agency (FCT), the Universities of Coimbra, Lisbon and Minho, IST (Técnico-Lisbon) and ANIMEE (Electrical and Electronics Business Association).

Presenter: PIMENTA, Mario (LIP Laboratório de Instrumentação e Física Experimental de Partículas (PT))

Session Classification: Kviestinis pranešimas
