

PLANCK 2011 - From the Planck Scale to the ElectroWeak Scale

Tuesday, 31 May 2011

P4 - SUPERSYMMETRY - Main Auditorium (16:30 - 19:00)

-Conveners: Stephane Lavignac

time	[id] title	presenter
16:30	[77] Decoupling the Gravity Multiplet from Supergravity	D'ERAMO, Francesco
16:45	[12] Condensates and R-balls in the SUSY breaking sector	Mr BARNARD, James
17:00	[32] Goldstino Couplings in MSSM	TZIVELOGLOU, Pantelis
17:15	[0] Singlet deflection of gauge mediation	DELGADO, Antonio
17:30	[105] Lopsided Gauge Mediation	Mr PAPPADOPULO, Duccio
17:45	[54] Supersymmetry Breaking in a Minimal Anomalous Extension of the MSSM	Dr RACIOPPI, Antonio
18:00	[3] More minimal MRSSM: R symmetry as lepton number, sneutrino as down type higgs	Ms FRUGIUELE, Claudia
18:15	[8] Solving μ and little hierachy problems of the MSSM with electroweak triplets	AZATOV, Aleksandr
18:30	[112] Flavour physics as a probe of SUSY scenarios and implications of the LHC	MAHMOUDI, Nazila
18:45	[116] A possible connection between neutrino mass generation and the lightness of a NMSSM pseudoscalar	DEBOTTAM, Das
