Towards perfect quantum sensing: gate-controlled bi-superconducting quantum interference devices.

Thursday 15 December 2022 17:00 (15 minutes)

It has been demonstrated that the behaviour of superconducting quantum interference devices can be precisely tuned using electrostatic gates. We discuss the recent experimental results and summarise our current theoretical understanding of this effect.

Author: KONG, Thomas (The University of Adelaide)

Co-authors: Dr GIAZOTTO, Francesco (Scuola Normale Superiore); Dr DE SIMONI, Giorgio (Scuola Normale Superiore); Dr TETTAMANZI, Giuseppe (University of Adelaide); Dr CRUDDAS, Jace (University of Adelaide)

Presenter: KONG, Thomas (The University of Adelaide)

Session Classification: Precision and Quantum Sensing Workshop

Track Classification: PQS2022: PQS: Precision and Quantum Sensing Workshop
