## **The magic of three levels: Robust quantum magnetometry at ultra low frequencies**

*Tuesday 13 December 2022 17:00 (15 minutes)*

A discussion on utilising a dressed three level system as a magnetometer at ultra low frequencies, in the presence of dominating line noise.

**Primary authors:** TRITT, Alex (Monash University); BOUNDS, Christopher (School of Physics & Astronomy, Monash University, Victoria 3800, Australia.); TAYLOR, Hamish (School of Physics & Astronomy, Monash University, Victoria 3800, Australia.); TURNER, Lincoln (School of Physics & Astronomy, Monash University, Victoria 3800, Australia.); WHITE, Samuel

**Presenter:** WHITE, Samuel

**Session Classification:** Precision and Quantum Sensing Workshop

**Track Classification:** PQS2022: PQS: Precision and Quantum Sensing Workshop
