## Increasing silica loading in fibre preform fabrication by 3D DLP printing

*Tuesday 13 December 2022 18:45 (15 minutes)*

The processing of UV curable resin for manufacturing 3D fibre preforms based on DLP technology has been investigated. Fibre preforms with higher silica loading have been successfully fabricated.

**Primary author:** Ms WANG, Jiaying (1 Photonics and Optical Communications, School of Electrical Engineering & Telecommunications, University of New South Wales, Sydney, NSW 2052, Australia 2 Materials and Manufacturing Futures Institute, UNSW Sydney, NSW 2052, Australia)

**Co-authors:** Prof. PENG, Gang-Ding (1 Photonics and Optical Communications, School of Electrical Engineering & Telecommunications, University of New South Wales, Sydney, NSW 2052, Australia 2 Materials and Manufacturing Futures Institute, UNSW Sydney, NSW 2052, Australia); Prof. ZHANG, Jianzhong (1 Key Laboratory of In-fiber Integrated Optics of Ministry of Education, College of Physics and Optoelectronic Engineering, Harbin Engineering University, Harbin 150001, China 2 Fiber Optical Sensing Center for Excellence, Yantai Research Institute & Graduate School, Harbin Engineering University, Yantai 264000, China); Ms KONG, Jing (1 Photonics and Optical Communications, School of Electrical Engineering & Telecommunications, University of New South Wales, Sydney, NSW 2052, Australia 2 Materials and Manufacturing Futures Institute, UNSW Sydney, NSW 2052, Australia); Dr LUO, Yanhua (1 Photonics and Optical Communications, School of Electrical Engineering & Telecommunications, University of New South Wales, Sydney, NSW 2052, Australia 2 Materials and Manufacturing Futures Institute, UNSW Sydney, NSW 2052, Australia); Dr CHU, Yushi (1 Key Laboratory of In-fiber Integrated Optics of Ministry of Education, College of Physics and Optoelectronic Engineering, Harbin Engineering University, Harbin 150001, China 2 Fiber Optical Sensing Center for Excellence, Yantai Research Institute & Graduate School, Harbin Engineering University, Yantai 264000, China)

**Presenter:** Ms WANG, Jiaying (1 Photonics and Optical Communications, School of Electrical Engineering & Telecommunications, University of New South Wales, Sydney, NSW 2052, Australia 2 Materials and Manufacturing Futures Institute, UNSW Sydney, NSW 2052, Australia)

**Session Classification:** Poster session

**Track Classification:** WSOF: WSOF: Novel manufacturing: 3D printing, postprocessing, coatings
