Extending the low-frequency limit of qubit noise spectroscopy beyond the inverse dephasing time

Monday 12 December 2022 17:00 (15 minutes)

We propose and demonstrate a novel spectroscopy method on donor spin qubit in silicon, which resolves the challenge of low frequency noise estimation with fine resolution

Author: YU, Xi (University of New South Wales)

Co-authors: MORELLO, Andrea (University of New South Wales); Mr WILHELM, Benjamin (University of New South Wales); PAZ-SILVA, Gerardo (Griffith University); Dr WANG, Yuanlong (Key Laboratory and Systems and Control, Academy of Mathematics and System Science, Chinese Academy of Sciences, Beijing, China)

Presenter: YU, Xi (University of New South Wales)

Session Classification: AIP: Quantum Science and Technology

Track Classification: AIP Congress: AIP: Quantum Science and Technology
