Multimodal fibre-optic imaging probe for detection of atherosclerotic plaques using fluorescent nanoparticles

Wednesday 14 December 2022 11:45 (15 minutes)

This project utilises a miniaturised fibre-optic probe with dual-modality imaging capability that can simultaneously acquire optical coherence tomography and fluorescence in diseased blood vessels of mice injected with fluorescent nanoparticles.

Author: Ms CHEN, Rouyan (School of Electrical and Electronic Engineering, The University of Adelaide, Adelaide, SA 5005, Australia.)

Co-authors: Ms SANDEMAN, Lauren (South Australian Health and Medical Research Institute (SAHMRI), Adelaide, SA, 5000 Australia); Ms NANKIVELL, Victoria (South Australian Health and Medical Research Institute (SAHMRI), Adelaide, SA, 5000 Australia); Dr TAN, Joanne (South Australian Health and Medical Research Institute (SAHMRI), Adelaide, SA, 5000 Australia); Dr ZHENG, Gang (Department of Medical Biophysics, University of Toronto, Ontario M5G1L7, Canada); Prof. PSALTIS, Peter (South Australian Health and Medical Research Institute (SAHMRI), Adelaide, SA, 5000 Australia); Prof. BURSILL, Christina (South Australian Health and Medical Research Institute (SAHMRI), Adelaide, SA, 5000 Australia); Prof. MCLAUGHLIN, Robert (Faculty of Health and Medical Sciences, The University of Adelaide, Adelaide, SA 5005, Australia); Dr LI, Jiawen (School of Electrical and Electronic Engineering, The University of Adelaide, Adelaide, SA 5005, Australia.)

Presenter: Ms CHEN, Rouyan (School of Electrical and Electronic Engineering, The University of Adelaide, Adelaide, SA 5005, Australia.)

Session Classification: Australian and New Zealand Conference on Optics and Photonics

Track Classification: ANZCOP: ANZCOP: Microscopy, spectroscopy and imaging
