## **Three-dimensional characterisation of cellular elasticity using quantitative micro elastography**

*Wednesday 14 December 2022 15:15 (15 minutes)*

The elasticity of cells and their environment are critical regulators of cell functions. In this work, we present the development of quantitative micro-elastography to characterise the elasticity of cells and cell spheroids in 3-D biomaterials.

**Primary authors:** Dr HEPBURN, Matt (The University of Western Australia); Dr MOWLA, Alireza (The University of Western Australia); Mr LI, Jiayue (The University of Western Australia); Mr MAHER, Samuel (The University of Western Australia); Ms VAHALA, Danielle (The University of Western Australia); Mr AMOS, Sebastian (The University of Western Australia); Ms NAVAEIPOUR, Farzan (The University of Western Australia); Dr CHOI, Yu Suk (The University of Western Australia); Dr KENNEDY, Brendan (The University of Western Australia)

**Presenter:** Dr HEPBURN, Matt (The University of Western Australia)

**Session Classification:** Australian and New Zealand Conference on Optics and Photonics

**Track Classification:** ANZCOP: ANZCOP: Microscopy, spectroscopy and imaging
