The Role of Vector Boson Fusion in the Production of Heavy Vector Triplets at the LHC and HL-LHC

Monday 12 December 2022 15:15 (15 minutes)

Pertaining to the analysis of heavy vector production at the LHC, this project focuses on vector boson fusion as the dominant production channel for heavy vector triplets and presents limits within the relevant parameter space.

Primary authors: Dr THAMM, Andrea (School of Physics, The University of Melbourne, Victoria 3010, Australia); Dr BAKER, Michael (ARC Centre of Excellence for Dark Matter Particle Physics, School of Physics, The University of Melbourne, Victoria 3010, Australia); Dr TORRE, Riccardo (INFN, Sezione di Genova, Via Dodecaneso 33, I-16146 Genova, Italy); Mr MARTONHELYI, Timothy (School of Physics, The University of Melbourne, Victoria 3010, Australia)

Presenter: Mr MARTONHELYI, Timothy (School of Physics, The University of Melbourne, Victoria 3010, Australia)
