Confining sound in superfluids via optomechanics

Tuesday 13 December 2022 16:00 (30 minutes)

The coupling of light with a mechanical degree of freedom is usually limited to exciting mechanical modes that are defined by the structure being used. We are working towards a regime where light can be used to define mechanical modes.

Co-authors: Dr SAWADSKY, Andreas Sawadsky; Dr BAKER, Christopher (The University of Queensland); Dr HARRIS, Glen (The University of Queensland); Mr WASSERMAN, Walter (The University of Queensland); Prof. BOWEN, Warwick (The University of Queensland)

Presenter: Mr HARRISON, Raymond (The University of Queensland)

Session Classification: Australian and New Zealand Conference on Optics and Photonics

Track Classification: ANZCOP: ANZCOP: Optoacoustics
