Deactivation of NV- color centers in glass-sandwiched diamond particles

Friday 16 December 2022 10:15 (15 minutes)

Nitrogen-vacancy colour centres in diamonds have unique properties that attract significant attention for various applications. This work explores the deactivation of NV centres in diamond particles embedded in glass for an alternative fast sensor fabrication technique.

Primary authors: Prof. GREENTREE, Andrew (RMIT University); Prof. GIBSON, Brant (RMIT University); SIMPSON, David (The University of Melbourne School of Physics); EBENDORFF-HEIDEPRIEM, Heike; Dr CAPELLI, Marco (RMIT University); HUYNH, Minh Hoa (The University of Adelaide); Dr REINECK, Philipp (RMIT University); Dr FOSTER, Scott (Defence Science and Technology Group); Prof. AFSHAR VAHID, Shahaam (University of South Australia); Dr LI, Shou (RMIT University); ZHANG, Wen Qi (University of South Australia)

Presenter: ZHANG, Wen Qi (University of South Australia)

Session Classification: Australian and New Zealand Conference on Optics and Photonics

Track Classification: ANZCOP: ANZCOP: Novel materials
